Dr.D.KALPANA (CSIR)

- Boosting efficiency and stability using zirconia nanospheres held carbon for proton exchange membrane fuel cells, , P. Dhanasekaran, Sharon R Williams, D. Kalpana, Santoshkumar. D. Bhat Accepted in RSC Advances.
- A bio-derived carbon as an efficient supporting electro-catalyst for oxygen reduction reaction, P Rupa Kasturi, arunchander frederick, D. Kalpana, Kalaiselvan R, Communicated to Journal of Physics and Chemistry of Solids
- Fabrication of solid-state flexible fiber supercapacitor using agave americana derived activated carbon and its performance analysis at different conditions, K. Pandi, K. Vijaya Sankar, D. Kalpana, Y. S. Lee, and R. Kalai Selvan, ChemistrySelect 2016, 1, 1 – 11.
- Activated carbon from orange peels as supercapacitor electrode and catalyst support for oxygen reduction reaction in proton exchange membrane fuel cell, M. Dhelipan, A. Arunchander, A. K. Sahu, D. Kalpana, Journal of Saudi Chemical Society 4 (2017) 487-494.
- Development of high-performance supercapacitor electrode derived from sugar industry spent wash waste, Ashesh Mahto, Rajeev Gupta, Krishna Kanta Ghara, Divesh N. Srivastava, PratyushMaity, D. Kalpana, Paul Zavala-Revira, R. Meena and S.K. Nataraj, Accepted in Journal of Hazardous Materials
- Surfactant-free hydrothermal synthesis of hierarchically structured spherical CuBi2O4 as negative electrodes for Li-ion hybrid capacitors, S. Yuvaraj, K. Karthikeyan, D. Kalpana, Y.S. Lee, R. Kalaiselvan, Journal of Colloid and Interface science 469 (2016) 47-56.
- Effects of temperature and pore structure on high surface area-activated carbon obtained from Peanut Shells, D. Kalpana, Y.S. Lee, J. Nanoscience and Nanotechnology, 16 (2016) 1- 6.
- Electrochemical properties of CoFe2O4 nanoparticles as negative and Co(OH)2 and Co2Fe(CN)6 as positive electrodes for pseudocapacitors, A. Shanmugavani, D. Kalpana, R. Kalaiselvan, Materials Research Bulletin 71 (2015) 133-141.
- Effect of pH on the sonochemical synthesis of BiPO4 nanostructures and its electrochemical properties for pseudocapacitors, Nithya V.D, Hanitha B, Surendran S, D. Kalpana, R. Kalaiselvan, UltrasonicsSonochemistry 22 (2015) 300-310.
