

Dr. CHERALATHAN

SRM Chennai.

1. An experimental study on energy and exergy performance of a spiral tube receiver for solar parabolic dish concentrator, *Energy*, Volume 192, 1 February 2020, 116635.
2. Experimental mitigation of NO_x emission in exhaust gases of CI engine fuelled with methyl ester of cottonseed oil blend, *International Journal of Ambient Energy*, Volume 41, 2020 - Issue 12, Pages 1352-1356.
3. Experimental investigation on thermal performance of cavity receiver integrated with short-term thermal energy storage for a solar parabolic dish concentrator, *J Therm Anal Calorim* (2020). <https://doi.org/10.1007/s10973-020-10387-6>.
4. Influence of thermal transport properties of NEPCM for cool thermal energy storage system, *J Therm Anal Calorim* (2020). <https://doi.org/10.1007/s10973-020-10339-0>.
5. Effect of non-uniform temperature distribution on surface absorption receiver in parabolic dish solar concentrator, January 2015 *Thermal Science* 2015(00):169-169.
6. Enhancement of the thermal energy storage capacity of a parabolic dish concentrated solar receiver using phase change materials, *Journal of Energy Storage*, Volume 25, October 2019, 100841.
7. Effect of aspect ratio on thermal performance of cavity receiver for solar parabolic dish concentrator: An experimental study, *Renewable Energy*, Volume 139, August 2019, Pages 573-581.
8. Thermal performance enhancement of solar air collector using a novel V-groove absorber plate with pin-fins for drying agricultural products: an experimental study, *Journal of Thermal Analysis and Calorimetry* volume 140, pages 2397–2408 (2020).
9. Encapsulated PCM based double pass solar air heater: A comparative experimental study, <https://doi.org/10.1080/00986445.2019.1641701>.
10. Experimental study of effect of isobutanol in performance, combustion and emission characteristics of CI engine fueled with cotton seed oil blended diesel, *Alexandria Engineering Journal*, Volume 57, Issue 3, September 2018, Pages 1369-1378.
11. Analysis of solar flat plate collector with straight and helical flow path heat tube using mathematical modeling and java-based simulation, *IOP Conference Series: Materials Science and Engineering*, C Prabhu et al 2018 IOP Conf. Ser.: Mater. Sci. Eng. 402 012110.
12. Experimental study of a solar dryer with different flow patterns of air in the drying chamber, September 2018 *IOP Conference Series Materials Science and Engineering* 402(1):012014.
13. Experimental study on heat losses from external type receiver of a solar parabolic dish collector
14. October 2018 *IOP Conference Series Materials Science and Engineering* 402(1):012196.
15. An experimental study on energy and exergy performance of a cavity receiver for solar parabolic dish concentrator, *International Journal of Exergy*, 2017 Vol.23 No.2, pp.129 - 148.
16. Effect of the phase change material in a solar receiver on thermal performance of parabolic dish collector, January 2016 *Thermal Science* 2016(00):7-7.
17. Effect of non-uniform temperature distribution on surface absorption receiver in parabolic dish solar concentrator, January 2015 *Thermal Science* 2015(00):169-169.
18. Influence of alumina oxide nanoparticles on the performance and emissions in a methyl ester of neem oil fuelled direct injection Diesel engine, January 2016 *Thermal Science* 21(00):165-165.

19. Simultaneous Testing of a Parabolic Dish Concentrated PCM and Non-PCM Solar Receiver, December 2017, DOI: 10.24247/ijmpddec20178.
20. Natural heat transfer enhancement methods in phase change material based thermal energy storage, Corpus ID: 33890625.
21. Effect of Once-through and Recirculated Fluid Flow on Thermal Performance of Parabolic Dish Solar Receiver, September 2016 Indian Journal of Science and Technology 9(33).
22. The effect of antioxidant additives with methyl ester of neem oil on the oxidation stability, Energy Sources, Part A: Recovery, Utilization, and Environmental Effects, Volume 38, 2016 - Issue 16, Pages 2454-2461, 2016, International Journal of ChemTech Research, pages : 303-308.
23. Experimental investigation to reduce exhaust emissions in a single cylinder CI engine fueled with methyl ester of neem oil using antioxidant (L-ascorbic acid), Biofuels Volume 7, 2016 - Issue 3, Pages 305-312.
24. Thermal Performance of Solid and Liquid Energy Storage Materials in a Parabolic Dish Solar Cooker, Int J Chem Sci, Volume :14, Pages :1977-1983.
25. Effect of container size on thermal performance of sugar alcohol (D-Mannitol) in concentrated solar receiver, 2016, International Journal of Chemical Sciences, 14 (4), , Pages: 2349-2357.
26. Study of antioxidant effect on oxidation stability and emissions in a methyl ester of neem oil fuelled DI diesel engine, Journal of the Energy Institute, Volume 87, Issue 3, August 2014, Pages 188-195.
27. Effect of CNT as additive with biodiesel on the performance and emission characteristics of a DI diesel engine, 2015, International Journal of ChemTech Research, Volume 7, Issue 3, Pages 1230-1236.
28. Influence of the size of spherical capsule on solidification characteristics of DI (deionized water) water for a cool thermal energy storage system—An experimental study, Energy, Volume 90, Pages: 807- 813.
29. Effect of fill volume on solidification characteristics of DI (deionized) water in a spherical capsule – An experimental study, Energy Volume 90, Part 1, October 2015, Pages 508-515.
30. Simultaneous Reduction of NO_x and HC Emissions in a CI Engine Fueled with Methyl Ester of Neem Oil Using Ethylenediamine as Antioxidant Additive, Energy Sources, Part A: Recovery, Utilization, and Environmental Effects Volume 37, 2015 - Issue 24, Pages 2684-2691.
31. Thermal Performance of Solar Parabolic Dish Concentrator with Hetero-Conical Cavity Receiver, Applied Mechanics and Materials (Volume 787), Pages: 197-201.
