

Relating the embedding efficiency of LSB steganography techniques in spatial and transform domains

P Malathi, **T Gireeshkumar** - *Procedia Computer Science*, 2016 - Elsevier

This paper is based on image steganography that is Least Significant Bits (LSB) techniques on images to enhance the security of the communication. The LSB-based technique is the most challenging one because it is difficult to differentiate between the cover-object and ...

An autonomous obstacle avoiding and target recognition robotic system using kinect

A Velayudhan, **T Gireeshkumar** - *Intelligent Computing, Communication ...*, 2015 - Springer

This article describes the development of an autonomous navigation system for mobile robots which can be used in unstructured and unknown indoor environment. Histogram of the range data captured using Kinect is utilized in developing the obstacle avoidance ...

A Probabilistic Method Toward SLAM for Mobile Robotic Systems

RS Anoop, **T Gireeshkumar**, G Saisuriyaa - ... , *Communication and Devices*, 2015 - Springer

Simultaneous localization and mapping (SLAM) problem helps a mobile robot in identifying its own position by providing an autonomously built map. This work proposes a software and hardware approach for online mobile robotic systems, which is capable of performing SLAM ...

A novel authentication framework for Hadoop

PK Rahul, **T GireeshKumar** - *Artificial Intelligence and Evolutionary ...*, 2015 - Springer

Hadoop is an open-source file system used to process and carry Big data which is out of the reach of normal softwares to be work on. This paper analyses the data security issues in Hadoop and proposes a new authentication framework for clients. The framework uses ...

Block dependency feature based classification scheme for uncalibrated image steganalysis

DD Shankar, **T Gireeshkumar**, K Praveen... - ... *Conference on Data ...*, 2010 - Springer

Steganalysis is a technique of detecting hidden information sent over a communication medium. In this paper, we present a powerful new blind steganalytic scheme that can reliably detect hidden data in JPEG images. This would increase the success rate of ...
