

Evaluation of tribological characteristics of nano zirconia dispersed biodegradable canola oil methyl ester metalworking fluid, N. Nagabhooshanam, S Baskar, T. Ram Prabhu, S. Arumugam Tribology International, Elsevier, 151, <https://doi.org/10.1016/j.triboint.2020.106510>.

Polyolester Based Lubricant from Waste Feedstock for Sustainable Environment: A Tribological Investigation, S Arumugam, S Baskar, V Sankara Subramanian and G Shivasankaran, IOP Conference Series: Materials Science and Engineering, 954, 2020, <https://doi.org/10.1088/1757-899X/954/1/012021>.

Ultrasound supported synthesis of waste mangifera indica linn biodiesel: an optimization using whale algorithm, S Arumugam, C Peddamangari Venkatesulu Reddy, T Arulvalavan, and G Sriram, Energy Sources, Part A: Recovery, Utilization, and Environmental Effects, 1-15, 2020, <https://doi.org/10.1080/15567036.2020.1832630>.

Feasibility Study of Biodiesel Synthesis from Waste Ayurvedic Oil: Its Evaluation of Engine Performance, Emission and Combustion Characteristics, R Balakumar, G Sriram, S Arumugam Arabian Journal for Science and Engineering 44 (9), 8067-8079, 2019.

Experimental Analysis on Tribological Behavior of Nano Based Bio-Lubricants using Four Ball Tribometer. S Baskar, G Sriram, S Arumugam, Tribology in Industry 37 (4)

Multi-response optimization of epoxidation process parameters of rapeseed oil using response surface methodology (RSM)-based desirability analysis, S Arumugam, G Sriram, T Rajmohan, Arabian Journal for Science and Engineering 39 (3), 2277-2287

Synthesis, chemical modification and tribological evaluation of plant oil as bio-degradable low temperature lubricant, S Arumugam, G Sriram, L Subadhra, Procedia engineering 38, 1508-1517

Tribological analysis of a hydrodynamic journal bearing under the influence of synthetic and biolubricants, S Baskar, G Sriram, S Arumugam, Tribology Transactions 60 (3), 428-436

Formulation of green crankcase oil-a novel approach, S Arumugam, G Sriram, V Santhanam, IEEE-International Conference On Advances In Engineering, Science And ...

Application of artificial intelligence to predict the performance and exhaust emissions of diesel engine using rapeseed oil methyl ester, S Arumugam, G Sriram, PRS Subramanian, Procedia engineering 38, 853-860

Comparative study of engine oil tribology, wear and combustion characteristics of direct injection compression ignition engine fuelled with castor oil biodiesel and diesel fuel, S Arumugam, G Sriram, Australian Journal of Mechanical Engineering 10 (2), 119-128

The Use of D-optimal Design for Modeling and Analyzing the Tribological Characteristics of Journal Bearing Materials Lubricated by Nano-Based Biolubricants, S Baskar, G Sriram, S Arumugam, Tribology Transactions 59 (1), 44-54

Effect of Lubricant contaminated with Waste Ayurvedic Oil Biodiesel on Tribological Behavior of Cylinder Liner-Piston Ring Tribo pair Material, R Balakumar, G Sriram, S Arumugam, Materials Today: Proceedings 5 (5), 13220-13226

Synthesis, characterisation and tribological investigation of vegetable oil-based pentaerythryl ester as biodegradable compressor oil, S Arumugam, P Chengareddy, G Sriram, Industrial crops and products 123, 617-628.

Tribological analysis of biodegradable refrigeration oil for vapour compression refrigeration system using four ball tribometer, P Vithya, G Sriram, S Arumugam, BV Harinath, A Saijagadeeswar, IOP Conference Series: Materials Science and Engineering 390 (1), 012070

Waste Ayurvedic Oil as a Engine Fuel—A Review, R Balakumar, G Sriram, S Arumugam, Advanced Science, Engineering and Medicine 10 (3-4), 249-254

Feasibility Analysis of Biodegradable Automotive Lubricant: An Evaluation of Material–Lubricant Compatibility in a Corrosion Perspective, S Arumugam, R Ellappan, S Sangavi, G Sriram, P Ramakrishna, Arabian Journal for Science and Engineering 43 (3), 1345-1368.
