

**5.Dr. D. Kalpana**

**Senior Scientist**

**CSIR Madras Complex, Taramani P.O**

**Chennai - 600 113, India.**

**E-mail: drkalpanaa@gmail.com**

**Area of Specialization: Fuel cells and supercapacitors**

#### **LIST OF PUBLICATIONS SO FAR**

1. B  
Boosting efficiency and stability using zirconia nanospheres held carbon for proton exchange membrane fuel cells, P. Dhanasekaran, Sharon R Williams, D. Kalpana, Santoshkumar. D. Bhat Accepted in RSC Advances.
2. A  
bio-derived carbon as an efficient supporting electro-catalyst for oxygen reduction reaction, P Rupa Kasturi, arunchander frederick, D. Kalpana, Kalaiselvan R, Communicated to Journal of Physics and Chemistry of Solids
3. F  
Fabrication of solid-state flexible fiber supercapacitor using agave americana derived activated carbon and its performance analysis at different conditions, K. Pandi, K. Vijaya Sankar, D. Kalpana, Y. S. Lee, and R. Kalai Selvan, ChemistrySelect 2016, 1, 1 – 11.
4. A  
Activated carbon from orange peels as supercapacitor electrode and catalyst support for oxygen reduction reaction in proton exchange membrane fuel cell, M. Dhelipan, A. Arunchander, A. K. Sahu, D. Kalpana, Journal of Saudi Chemical Society 4 (2017) 487-494.
5. D  
Development of high-performance supercapacitor electrode derived from sugar industry spent wash waste, Ashesh Mahto, Rajeev Gupta, Krishna Kanta Ghara, Divesh N. Srivastava,

PratyushMaity, D. Kalpana, Paul Zavala-Revira, R. Meena and S.K. Nataraj, Accepted in Journal of Hazardous Materials

6. S  
urfactant-free hydrothermal synthesis of hierarchically structured spherical  $\text{CuBi}_2\text{O}_4$  as negative electrodes for Li-ion hybrid capacitors, S. Yuvaraj, K. Karthikeyan, D. Kalpana, Y.S. Lee, R. Kalaiselvan, Journal of Colloid and Interface science 469 (2016) 47-56.
7. E  
ffects of temperature and pore structure on high surface area-activated carbon obtained from Peanut Shells, D. Kalpana, Y.S. Lee, J. Nanoscience and Nanotechnology, 16 (2016) 1-6.
8. EI  
lectrochemical properties of  $\text{CoFe}_2\text{O}_4$  nanoparticles as negative and  $\text{Co}(\text{OH})_2$  and  $\text{Co}_2\text{Fe}(\text{CN})_6$  as positive electrodes for pseudocapacitors, A. Shanmugavani, D. Kalpana, R. Kalaiselvan, Materials Research Bulletin 71 (2015) 133-141.
9. E  
ffect of pH on the sonochemical synthesis of  $\text{BiPO}_4$  nanostructures and its electrochemical properties for pseudocapacitors, Nithya V.D, Hanitha B, Surendran S, D. Kalpana, R. Kalaiselvan, UltrasonicsSonochemistry 22 (2015) 300-310.
10. S  
ynthesis of  $\text{Bi}_2\text{WO}_6$  nanoparticles and its electrochemical properties in different electrolytes for pseudocapacitor electrodes, V.D. Nithyaa, R. KalaiSelvan, D. Kalpana, Leonid Vasylechko, C. Sanjeeviraja, ElectrochimicaActa 109 (2013) 720– 731.
11. M  
icrowave synthesis of graphene/magnetite composite electrode material for symmetric supercapacitor with superior rate performance, K. Karthikeyan, D. Kalpana, Amaresh and Yun Sung Lee, RSC Advances, 2012, 2, 12322–12328.
12. EI  
lectrochemical properties of microwave-assisted reflux-synthesized  $\text{Mn}_3\text{O}_4$  nanoparticles in

different electrolytes for supercapacitor applications, K. VijayaSankar, D. Kalpana, R. KalaiSelvan, J ApplElectrochem (2012) 42:463–470.

13. El  
electrochemical supercapacitor studies of hierarchial structured  $\text{Co}^{2+}$  substituted  $\text{SnO}_2$  nanoparticles by a hydrothermal method, K. Karthikeyan, K. Amaresh, D. Kalpana, and Yun Sung Lee, J. Physics and Chemistry of Solids, (2012) 73, 363-367.
14. N  
ew, low-cost, high-power poly(o-anisidine-co-metanilic acid)/activated carbon electrode for electrochemical supercapacitors, Kalpana, D., Lee, Y. S., and Sato, Y. Journal of Power Sources190, (2009) 592-595.
15. A  
Novel Hybrid Supercapacitor Using a Graphite Cathode and a Niobium(V) Oxide Anode, Park, G. J., Kalpana, D., Thapa, A. K., Nakamura, H., Lee, Y. S., and Yoshio, M Bulletin of the Korean Chemical Society30, (2009) 817-820.
16. S  
ynthesis and characterization of  $\text{ZnCo}_2\text{O}_4$  nanomaterial for symmetric supercapacitor applications, Karthikeyan, K., Kalpana, D., and Renganathan, N. G. Ionics15, (2009) 107-110.
17. R  
ecycled waste paper-A new source of raw material for electric double-layer capacitors, Kalpana, D., Cho, S. H., Lee, S. B., Lee, Y. S., Misra, R., and Renganathan, N. G. (2009) Journal of Power Sources190, 587-591.
18. El  
electrochemical characterization of supercapacitors based on carbons derived from coffee shells, M.R. Jisha, Yun Ju Hwang, Jae Sun Shin, Kee Suk Nahm, T. PremKumar, K. Karthikeyan, N. Dhanikaivelu, D. Kalpana, N.G. Renganathan, A. Manuel Stephan, Materials Chemistry and Physics 115(1) 2009, 33-39.
19. P  
otentiodynamic deposition of poly (o-anisidine-co-metanilic acid) on mild steel and its

application as corrosion inhibitor, Kumar, P. R., Kalpana, D., Renganathan, N. G., and Pitchumani, S. *Electrochimica Acta* 54, (2008) 442-447.

20. O  
lignine type nanoparticle for hybrid supercapacitors, R. Vasanthi, D. Kalpana, N.G. Renganathan, J. Solid State Electrochemistry, 12 (2008) 961-969.
21. C  
amphiphilic carbon nanobeads - A new electrode material for supercapacitors, Kalpana. D, Karthikeyan, K., Renganathan, N. G., and Lee, Y. S. *Electrochemistry Communications* 10, (2008) 977-979.
22. A  
acrylamide based proton conducting polymer gel electrolyte for electric double layer capacitors, B. Ganesh, D. Kalpana, N.G. Renganathan, *Ionics*, 14 (2008) 339-343.
23. E  
lectrocopolymerization of poly(o-toluidine-co-metaniolic acid) on mild steel surfaces and their physico-electrochemical characterizations, P. Rajakumar, D. Kalpana, N.G. Renganathan and S. Pitchumani, *Synthetic metals* 157 (2007) 899.
24. S  
tructural, magnetic and electrochemical studies on  $\text{LiCo}_{0.5}\text{Fe}_{0.5}\text{O}_2$ . Kalpana, R. Justin Joseyphus, N. Sivakumar, A. Narayanasamy and M. V. Ananth, *Ionics*, 12 (2006) 371.
25. A  
Novel high power symmetric ZnO/Carbon Aerogel composite electrode for electrochemical Supercapacitor, D. Kalpana, K.S. Omkumar, S. Suresh Kumar and N.G. Renganathan. *J. ElectrochimActa* 52 (2006) 1309.
26. S  
ize dependent properties of nanocrystalline NiO electrode for electrochemical capacitors" Proceedings in International Conference on Advances in Materials Processing and Characterization.

27. A  
new class of alkaline polymer gel electrolyte for carbon aerogel supercapacitor, D. Kalpana, N.G. Renganathan, S. Pitchumani *Journal of Power Sources*, 157(2006) 621.
28. I  
Influence of magnetic properties on electrochemical activity of  $\text{LiNi}_{0.5}\text{Fe}_{0.5}\text{O}_2$ , D. Kalpana, R. Justin Joseyphus, C. Venkateswaran, A. Narayanasamy, M.V. Ananth *Journal of Power Sources*, 156 (2006) 598.
29. El  
Electrochemical deposition of polypyrrole for symmetric supercapacitors by B. Muthulakshmi, D. Kalpana, N.G. Renganathan, S. Pitchumani, *Journal of Power Sources*, 158 (2006) 1533.
30. El  
Electrocatalytic properties of electrodeposited Ni–Mn–S system in alkaline electrolytes, D. Kalpana and M.V. Ananth, *Transactions of the Institute of Metal Finishing* 2005 Vol.83, No.31
31. S  
Synthesis and characterization of nanocrystalline  $\text{SnO}_2$  and fabrication of lithium cell using nano  $\text{SnO}_2$ , A. Chandra Bose, D. Kalpana, P. Thangadurai, S. Ramasamy, *Journal of Power Sources*, 107, (2002) 138-141.
32. H  
Hydrogen discharge on electrodeposited Ni-Mn-Fe coatings in 30 wt% KOH, A. Stephan, D. Kalpana, M.V. Ananth and V. Ravichandran, *International Journal of Hydrogen energy*, 24, (1999) 1059-1066.
33. S  
Synergistic effects and conductivity dispersions in  $\text{MnO}_2$ , D. Kalpana, M.V. Ananth, A. Narayanasamy, K. Dakshinamoorthi, *J. Electrochem. Soc. India*, 47 (1998) 34-38.
34. P  
Preparation and characterization of  $\text{Li}_{1.1}\text{Mn}_2\text{O}_4$ /polymer electrolyte graphite cell, R. Chandrasekaran, S. Selladurai, D. Kalpana, *Indian Journal of Pure and Applied Physics*, 37 (1999) 345-348.
