

- Facile growth of ZnO nanowire arrays and nanoneedle arrays with flower structure on ZnO-TiO₂ seed layer for DSSC applications 2017
T Marimuthu, N Anandhan, R Thangamuthu, S Surya
Journal of Alloys and Compounds 693, 1011-1019
- Synthesis of ZnO nanowire arrays on ZnOTiO₂ mixed oxide seed layer for dye sensitized solar cell applications 2016
T Marimuthu, N Anandhan, R Thangamuthu, M Mummoorthi, G Ravi
Journal of Alloys and Compounds 677, 211-218
- Electrochemical synthesis of one-dimensional ZnO nanostructures on ZnO seed layer for DSSC applications 2018
T Marimuthu, N Anandhan, R Thangamuthu
Applied Surface Science 428, 385-394
- Growth and characterization of ZnO nanostructure on TiO₂-ZnO films as a light scattering layer for dye sensitized solar cells 2017
T Marimuthu, N Anandhan
Materials Research Bulletin 95, 616-624
- Surfactant mediated one-and two-dimensional ZnO nanostructured thin films for dye sensitized solar cell application 2015
T Marimuthu, N Anandhan, R Thangamuthu, M Mummoorthi, S Rajendran, ...
Materials Research Express 2 (1), 015502
- Photocatalytic and electrochemical performance of hydrothermally synthesized cubic Cd₂SnO₄ nanoparticles 2016
S Dinesh, M Anandan, VK Premkumar, S Barathan, G Sivakumar, ...
Materials Science and Engineering: B 214, 37-45
- N-doped carbon quantum dots@ hexagonal porous copper oxide decorated multiwall carbon nanotubes: a hybrid composite material for an efficient ultra-sensitive determination of ... 2019
G Muthusankar, M Sethupathi, SM Chen, RK Devi, R Vinoth, G Gopu, ...
Composites Part B: Engineering 174, 106973
- Synthesis and characterization of copper sulfide thin films for quantum dot sensitized solar cell and supercapacitor applications 2019
T Marimuthu, N Anandhan, R Panneerselvam, KP Ganesan, AA Roselin
Nano-Structures & Nano-Objects 17, 138-147
- Electrochemically modified crystal orientation, surface morphology and optical properties using CTAB on Cu₂O thin films 2017
KP Ganesan, N Anandhan, V Dharuman, P Sami, R Pannerselvam, ...
Results in Physics 7, 82-86

- Impact of different transition metal ions in the structural, mechanical, optical, chemico-physical and biological properties of nanohydroxyapatite
R Panneerselvam, N Anandhan, G Gopu, KP Ganesan, T Marimuthu
Applied Surface Science 506, 144802 2020
- An enhancement of ferromagnetic, structural, morphological, and optical properties of Mn-doped Cu₂O thin films by an electrodeposition technique
KP Ganesan, N Anandhan, G Gopu, A Amaliroselin, T Marimuthu, ...
Journal of Materials Science: Materials in Electronics 30 (21), 19524-19535 2019
- Effect of Deposition Potential and Bath Temperature on One-Step Electrochemical Synthesis of One and Two Dimensional Nanostructured ZnO Thin Films on Fluorine Doped Tin Oxide ...
T Marimuthu, N Anandhan, R Thangamuthu, S Surya, R Panneerselvam, ...
Journal of nanoscience and nanotechnology 19 (11), 7014-7025 2019
- Electrochemical sensor for the detection of lead ions of B-site-doped bismuth titanate perovskite thin film
AA Roselin, N Anandhan, G Gopu, IJP Doss, KP Ganesan, RP Selvam, ...
Applied Physics A 125 (9), 669 2019
- Tuning the magnetic properties of electrochemically deposited Cu₂O thin films by Fe incorporation
KP Ganesan, N Anandhan, A Amaliroselin, R Thangamuthu, T Marimuthu, ...
Journal of Materials Science: Materials in Electronics 30 (16), 15482-15492 2019
- Role of Annealing Temperatures on Mechanical, Optical, Electrical and Magnetic Properties of Nanohydroxyapatite Biomaterial
R Panneerselvam, N Anandhan, G Sivakumar, KP Ganesan, T Marimuthu, ...
Journal of nanoscience and nanotechnology 19 (8), 4366-4376 2019
- Physicochemical and electrochemical analysis of rare earth metal doped BTO perovskite thin films
AA Roselin, N Anandhan, G Gopu, V Dharuman
AIP Conference Proceedings 2115 (1), 030302 2019
